*In this month's recap: the emerging coronavirus reins in the bulls on Wall Street, trade deals make headlines, the United Kingdom makes its Brexit, and confident U.S. households help the economy keep its pace.*

## Monthly Economic Update

*Presented by Corey Malstrom, CFP®, February 2020*

### THE MONTH IN BRIEF

Early January gains gave way to late January losses as the coronavirus emerged as a global health concern, and correspondingly, a concern for the investment markets. The S&P 500 ended up retreating 0.16% for the month. The coronavirus outbreak was just one of the big stories in January: President Trump signed one trade deal while Congress approved another, Brexit occurred, oil prices temporarily jumped as tensions between America and Iran heightened, and stocks hit record highs again.<sup>1</sup>

### DOMESTIC ECONOMIC HEALTH

On January 15, President Donald Trump and Chinese Vice-Premier Liu He signed the phase-one trade deal between the U.S. and China. The U.S. agreed to cut the existing 15% tariffs in half on certain Chinese goods, with the possibility of dismissing or reducing other import taxes on Chinese products in the coming months. China agreed to buy more U.S. crops, hard goods, and fuels, and to police counterfeiting of U.S. products and intellectual property to a greater degree. By mid-February, China is supposed to unveil an "action plan" for better intellectual property protection to U.S. trade officials.<sup>2</sup>

The Senate passed the U.S.-Mexico-Canada Agreement (USMCA), and President Trump signed it into law on January 29. Mexico has also approved the USMCA; if Canada does so, it will be finalized and take effect in 90 days. Intended as a replacement for the North American Free Trade Agreement (NAFTA), the USMCA would boost wages for auto industry workers in all three countries and make auto manufacturing more reliant on parts made in the west. The USMCA would also extend and broaden copyright terms in the digital age.<sup>3</sup>

January federal government reports showed 0.3% increases in household spending and retail sales in December. In addition to these positives, the Conference Board's consumer confidence index increased 3.4 points to 131.6, and the University of Michigan's consumer sentiment index ended the month at 99.8, slightly above its December final mark of 99.3. Late in January, the Bureau of Economic Analysis said the economy grew 2.1% in the final quarter of 2019, the same as it did in the third quarter.<sup>4</sup>

The Department of Labor's latest jobs report showed unemployment at only 3.5%, and underemployment (defined by the U-6 rate, which also counts discouraged and part-time workers) at merely 6.7%. Net monthly job growth, however, was just 139,000, and hourly wages were growing at 2.9% annually in December, down from 3.1% in November.<sup>5,6</sup>

Yearly inflation increased by 0.2% to 2.3% in January, according to the Consumer Price Index, which is maintained by the Bureau of Labor Statistics. The Federal Reserve has sought to keep inflation at or near 2% for some time.<sup>5</sup>

The manufacturing sector grew in January, according to the Institute for Supply Management's manufacturing Purchasing Manager Index. ISM's manufacturing sector PMI jumped up to 50.9 from 47.8 in December; analysts polled by MarketWatch had forecast another month of sector contraction, and a reading of 48.5. In early January, ISM's non-manufacturing PMI came in at 55.0 for December.<sup>5,6</sup>

## GLOBAL ECONOMIC HEALTH

Investors worldwide wondered if the flu-like coronavirus would hurt the powerful Chinese economy, where the disease was first reported in December. Nearly 10,000 Chinese citizens had been infected by the end of January, and the World Health Organization declared a public health emergency over the outbreak. If enough Chinese consumers are kept at home, corporate earnings could be hurt, and central banks might have to take action in response to slumping financial markets.<sup>7,8</sup>

New data showed that China's economy grew by 6.1% in 2019; the smallest seen in 29 years. Still, this figure fell into the Chinese government's target range for GDP. It dwarfed the Eurozone's 2019 economic expansion, which was only 1.2%.<sup>9,10</sup>

On January 31, the United Kingdom officially left the European Union and entered a transition period set to end on December 31, 2020. During these eleven months, the U.K. faces the challenge of forging new trade pacts with the E.U. and other nations, with a U.K.-E.U. deal at the top of the list.<sup>11</sup>

## WORLD MARKETS

Anxieties about the coronavirus also dampened risk appetite in foreign markets. A few gains stood out from the monthly losses: Mexico's Bolsa benchmark rose 1.30%, Australia's All Ordinaries improved 4.69%, and the Shanghai Composite added 0.47%. But besides those gains there were numerous downturns.<sup>12</sup>

The MSCI EAFE index, a broad benchmark for developed stock markets outside of North America, fell by 2.12%. Losses were felt elsewhere as well; France's CAC 40 lost 2.87%, Germany's DAX 2.02%, Spain's IBEX 35 1.90%, and Russia's RTS 2.06%. Losses were also seen across Asia. Hong Kong's Hang Seng slid 6.66%, India's Nifty 50 1.70%, Japan's Nikkei 225 1.91%, South Korea's Kospi 3.58%, Taiwan's TWSE 4.18%, and Indonesia's Jakarta Composite 5.71%.<sup>12,13</sup>

## COMMODITIES MARKETS

After surging in early January following a U.S. drone strike in Iraq, oil prices fell steadily across the

month. West Texas Intermediate crude settled at \$51.38 on the New York Mercantile Exchange (NYMEX) on January 31, down 15.61% year-to-date. Gold gained value: 4.01% on the NYMEX, to be precise. NYMEX Silver was flat (down 0.04%) for the month.<sup>14</sup>

Turning to other commodities, energy futures followed oil's path and posted double-digit declines: heating oil dropped 19.73%, natural gas 13.47%, and unleaded gas 12.44%. Platinum was off 3.11%, copper 10.94%. Wheat lost 1.97%, corn 2.43%, cotton 2.56%, soybeans 7.47%, and coffee 19.66%. On the other hand, cocoa improved 9.20% and sugar gained 11.27%. The U.S. Dollar Index rose 1.04% for the month.<sup>14,15</sup>

## REAL ESTATE

In January, the National Association of Realtors said that existing home sales improved by 10.0% in 2019. This happened despite the median sale price of a single-family home rising 7.8% over the year, to \$274,500 in December.<sup>16</sup>

Residential resales increased by 3.6% during the last month of 2019, reaching a pace not seen since February 2018. The NAR's pending home sales index, however, fell 4.9% for December. One possible factor influencing that pending home sales dip: a record-low 1.4 million listings were on the market.<sup>6,16</sup>

Mortgages grew less expensive in January. Freddie Mac's Primary Mortgage Market Survey (PMMS), released on January 30, showed that 30-year fixed-rate mortgages are averaging a 3.51% interest rate and 15-year fixed-rate mortgages are averaging a 3.00% interest rate. The PMMS released on January 2 showed that 30-year home loans bore an average interest rate of 3.72%, while 15-year home loans had an average interest rate of 3.16%.<sup>17</sup>

*30-year and 15-year fixed rate mortgages are conventional home loans generally featuring a limit of \$510,400 (\$765,600 in high-cost areas) that meet the lending requirements of Fannie Mae and Freddie Mac, but they are not mortgages guaranteed or insured by any government agency. Private mortgage insurance, or PMI, is required for any conventional loan with less than a 20% down payment.*

Construction on new homes reached a 13-year high in December, according to the Census Bureau. New home buying, though, declined 0.4% in that month (and decreased in every month of the third quarter). Regardless, new home sales surged 23% for 2019.<sup>16,18</sup>

---

### TIP OF THE MONTH

*If you are considering **disability insurance**, seek coverage with a benefit approximating **60% or more** of your **current income**.*

*Disability insurance is issued by participating insurance companies. Not all policy types and product features are available in all states. Any obligations are dependent on the ability of the issuing insurance company to continue making claim payments.*

---

## LOOKING BACK, LOOKING FORWARD

The S&P 500 settled at a new record of 3,329.62 on January 17 and then descended. Its January loss was but a fraction of that of the Dow Jones Industrial Average while the Nasdaq Composite

advanced for the month. The S&P ended January at 3,225.52, the Dow at 28,256.03, and the Nasdaq at 9,150.94.<sup>19,20</sup>

| MARKET INDEX | 1-MO CHANGE | 2019   | 2018  |
|--------------|-------------|--------|-------|
| DJIA         | -0.99       | +22.34 | -5.63 |
| NASDAQ       | +1.99       | +35.23 | -3.88 |
| S&P 500      | -0.16       | +28.88 | -6.24 |

| BOND YIELD     | 1/31 RATE | 1 MO AGO | 1 YR AGO |
|----------------|-----------|----------|----------|
| 10 YR TREASURY | 1.51      | 1.92     | 2.63     |

Sources: wsj.com, barchart.com, treasury.gov – 2/2/20<sup>20,21,22,23</sup>

Indices are unmanaged, do not incur fees or expenses, and cannot be invested into directly. These returns do not include dividends. 10-year Treasury yield = projected return on investment, expressed as a percentage, on the U.S. government's 10-year bond.

The markets (and central banks) are watching to see how far the coronavirus might spread and wondering what impact it may ultimately have on global commerce. If there are signs the outbreak is slowing, markets may breathe a collective sigh of relief. Meanwhile, U.S. economic data has been good as of late, especially regarding consumers, factories, and service industries. Still, traders might pay as much attention to the coronavirus this month as they do to earnings and fundamental indicators.

---

#### QUOTE OF THE MONTH

*"Whatever you do in life, surround yourself with smart people who'll argue with you."*

JOHN WOODEN

---

#### UPCOMING RELEASES

Here are the scheduled economic news items Wall Street is expected to have an eye on this month: the Institute for Supply Management's latest non-manufacturing purchasing managers index (2/5), the January jobs report from the Department of Labor (2/7), January's Consumer Price Index (2/13), the initial February University of Michigan consumer sentiment index and January retail sales (2/14), January housing starts, building permits, and wholesale inflation (2/19), January existing home sales (2/21), the Conference Board's February snapshot of consumer confidence (2/25), January new home sales (2/26), January durable goods orders (2/27), and then January personal spending and the final February University of Michigan consumer sentiment index (2/28).

*I am soft, and you can serve me indoors or outdoors, but you would not want to eat me. What am I?*

*LAST MONTH'S RIDDLE: It is met by feet in the morning, and sees few feet in the night. It may shake as if it is angry, but it will never bite. What is it?*

*ANSWER: The ground.*

This material was prepared by MarketingPro, Inc., and does not necessarily represent the views of the presenting party, nor their affiliates. The information herein has been derived from sources believed to be accurate. Please note - investing involves risk, and past performance is no guarantee of future results. Investments will fluctuate and when redeemed may be worth more or less than when originally invested. This information should not be construed as investment, tax or legal advice and may not be relied on for the purpose of avoiding any Federal tax penalty. This is neither a solicitation nor recommendation to purchase or sell any investment or insurance product or service, and should not be relied upon as such. All market indices discussed are unmanaged and are not illustrative of any particular investment. Indices do not incur management fees, costs, or expenses. Investors cannot invest directly in indices. All economic and performance data is historical and not indicative of future results. The Dow Jones Industrial Average is a price-weighted index of 30 actively traded blue-chip stocks. The NASDAQ Composite Index is a market-weighted index of all over-the-counter common stocks traded on the National Association of Securities Dealers Automated Quotation System. The Standard & Poor's 500 (S&P 500) is a market-cap weighted index composed of the common stocks of 500 leading companies in leading industries of the U.S. economy. NYSE Group, Inc. (NYSE:NYX) operates two securities exchanges: the New York Stock Exchange (the "NYSE") and NYSE Arca (formerly known as the Archipelago Exchange, or ArcaEx<sup>®</sup>, and the Pacific Exchange). NYSE Group is a leading provider of securities listing, trading and market data products and services. The New York Mercantile Exchange, Inc. (NYMEX) is the world's largest physical commodity futures exchange and the preeminent trading forum for energy and precious metals, with trading conducted through two divisions – the NYMEX Division, home to the energy, platinum, and palladium markets, and the COMEX Division, on which all other metals trade. The Mexican Stock Exchange, commonly known as Mexican Bolsa, Mexbol, or BMV, is the only stock exchange in Mexico. Established in January 1980, the All Ordinaries is the oldest index of shares in Australia. It is made up of the share prices for 500 of the largest companies listed on the Australian Securities Exchange. The SSE Composite Index is an index of all stocks (A shares and B shares) that are traded at the Shanghai Stock Exchange. The MSCI EAFE Index was created by Morgan Stanley Capital International (MSCI) that serves as a benchmark of the performance in major international equity markets as represented by 21 major MSCI indices from Europe, Australia, and Southeast Asia. The CAC-40 Index is a narrow-based, modified capitalization-weighted index of 40 companies listed on the Paris Bourse. The DAX 30 is a Blue-Chip stock market index consisting of the 30 major German companies trading on the Frankfurt Stock Exchange. The IBEX 35 is the benchmark stock market index of the Bolsa de Madrid, Spain's principal stock exchange. The RTS Index (Russia Trading System) is a free-float capitalization-weighted index of 50 Russian stocks traded on the Moscow Exchange, calculated in U.S. dollars. The Hang Seng Index is a free float-adjusted market capitalization-weighted stock market index that is the main indicator of the overall market performance in Hong Kong. The NIFTY 50 index National Stock Exchange of India's benchmark broad based stock market index for the Indian equity market. Nikkei 225 (Ticker: ^N225) is a stock market index for the Tokyo Stock Exchange (TSE). The Nikkei average is the most watched index of Asian stocks. The Korea Composite Stock Price Index or KOSPI is the index of all common stocks traded on the Stock Market Division—previously, Korea Stock Exchange—in the Korea Exchange. It is the representative stock market index of South Korea, like the S&P 500 in the United States. The TWSE, or TAIEX, Index is capitalization-weighted index of all listed common shares traded on the Taiwan Stock Exchange. The Jakarta Stock Price Index is a modified capitalization-weighted index of all stocks listed on the regular board of the Indonesia Stock Exchange. The U.S. Dollar Index measures the performance of the U.S. dollar against a basket of six currencies. Additional risks are associated with international investing, such as currency fluctuations, political and economic instability and differences in accounting standards.
